

CRUISING HOME – EXPLORE THE MOST BEAUTIFUL PLACES IN THE WORLD

WELCOME TO A NEW FREEDOM

Do you want to live, work and travel on the water? Then realize your dream of a „Custom Made Houseboat“ from CRUISING HOME, the specialist in sustainable and unique steel houseboats. We create lasting value. Unfortunately, plastics and lightweight construction dominate the market, but ultimately lead to higher maintenance costs and a great loss of value.

With a CRUISING HOME, you are purchasing a home that is built to be both, solid and sustainable. This means that future generations will still be able to enjoy your ship.

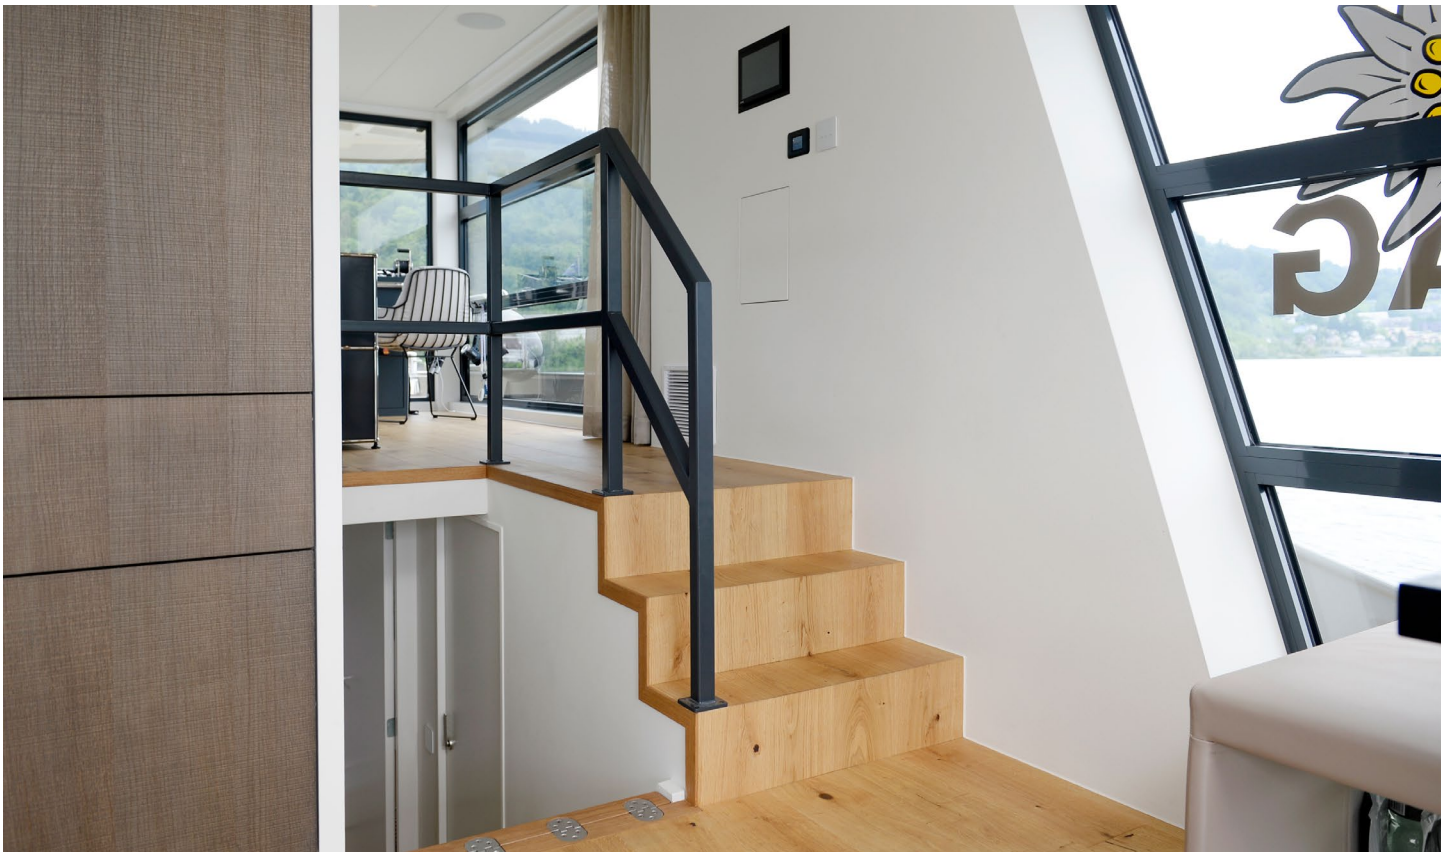

THE CRUISING HOME – EXPLORER CLASS

With a CH Explorer you will have residential, office and sailing vessel that will open up all waterways for you. With a standard draft of 3.45 m and a beam of 4.50 m, you have a very large sailing area at your disposal. Including the canals of France! The distinctive hull with V-bow and wave tunnel makes the CH Explorer safe and comfortable to travel with.

You can also equip your CRUISING HOME with special systems that are otherwise only installed in the top price segment for luxury ships, such as the DMS Magnus Master stabilizers, which provides roll damping and offers you safety and comfort on bigger waters or the Raymarine DockSense Control, which combines object recognition with vessels propulsion system in order to prevent collisions by creating a virtual fender in order to protect the boat.

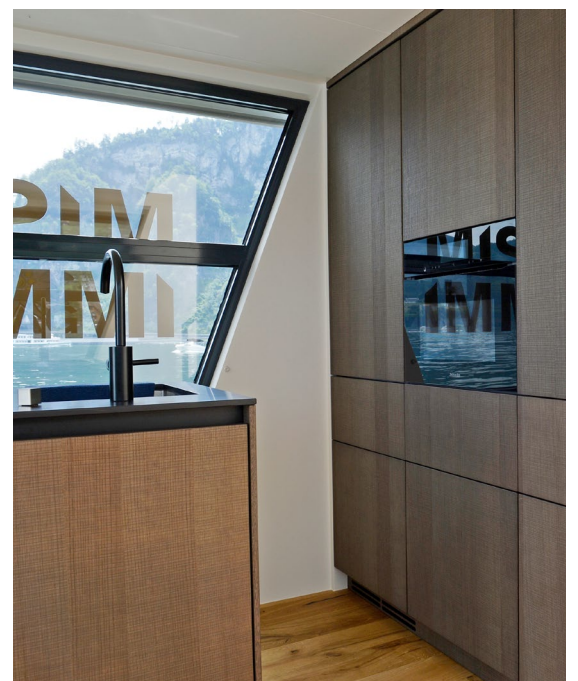

A TRUE WONDER OF SPACE

Our split level design offers comfortable living and working with full stand height on 3 levels. The rear kitchen and dining area is fully glazed and inspires with a wonderful panoramic view. From the living room and/or the office, which is located overlooking the bow of the ship and equipped with a sliding door over the entire width of the superstructure, you also have a beautiful panoramic view over the water.

Even if you are not used to being on board a ship, you will quickly find your way on the water.

Interesting facts about living and sailing a houseboat can be found on our website:

www.cruisinghome.eu/how-to-get-a-houseboat

YOUR HOME AND OFFICE ON THE WATER

With a CRUISING HOME you enjoy the same living comfort as at home, floor-to-ceiling double glazing, wood flooring with underfloor heating, a spacious fitted kitchen, fully equipped bathroom and custom-made bedroom with integrated bed and wardrobes are standard on board the CH Traveller. It is also possible to fully integrate the other furniture such as sofas and tables.

On request, we also build traveling offices, which you can operate tax-privileged. The 15 meter Explorer class offers space for up to 10 workstations equipped with Smarthome, WLAN, SAT TV and professional event technology.

DISCOVER THE WORLD ON BOARD YOUR SAILING APARTMENT

Unique design, sublime detailing and well thought-out hull shape. The CH Explorer was designed by Olivier van Meer Naval Architects, the result of which is that the Explorer has become a „houseyacht“ that is unrivalled.

With a CRUISING HOMEe you travel in style, comfortably and safely wherever you want. Whether you want to sail across France or discover beautiful coasts, the CH Explorer makes it possible.

SPACIOUS AND LOTS OF NATURAL LIGHT

The interior can be completely arranged as desired within the possibilities. The central staircase leads to the lower level where the spacious bedroom and bathroom(s) are located. Under the stairs, which can easily be hinged up with gas springs, you will find the entrance to the engine room.

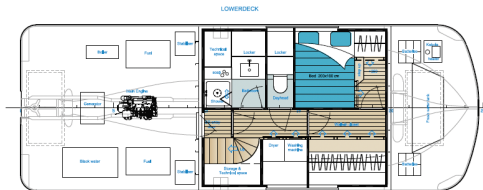

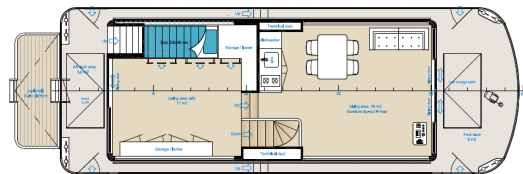

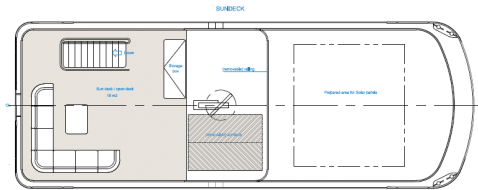

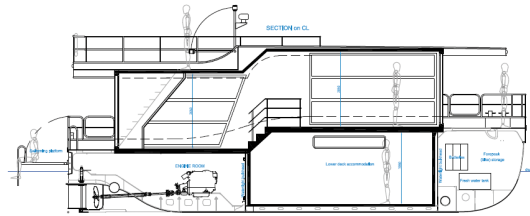

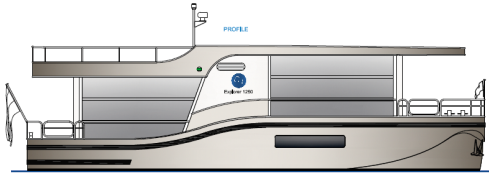

The different models, as well as further details and floor plans of our houseboats you will find under: www.cruisinghome.eu/vessels

CRUISING HOME EXPLORER CLASS OVERVIEW

The interior can be completely customized within the limits of possibilities.

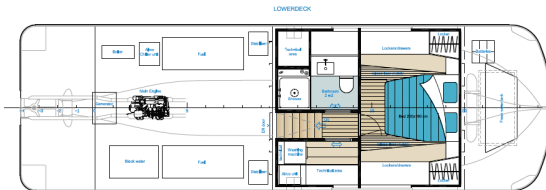

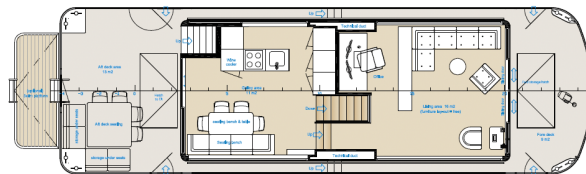

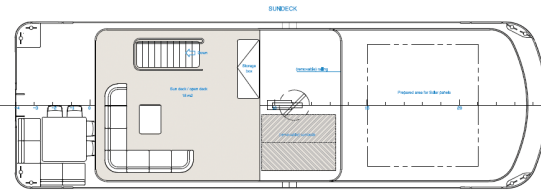

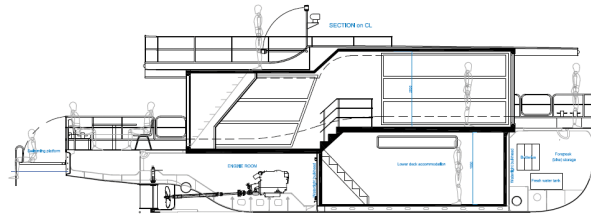

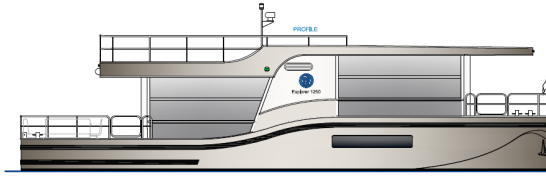

EXPLORER 1250

STATE OF THE ART TECHNOLOGY

You have the choice between different motor manufacturers and drive strengths. We install exclusively professional marine and industrial technology. For further alternative drives alike hybrid or full electric, we will be happy to advise you on request. If you want to be completely autonomous and off-grid for a longer period of time, your CH Explorer can be equipped with:

- Solar panels,
- Lithium battery pack,
- Generator,
- Water maker,
- Biological waste water cleaning system
